HCI

User research, flows, wireframes, usability evidence, and UI/UX presentation boards.

- Research board with stakeholders, personas, empathy maps, and problem statements.
- Journey maps and affinity/HMW boards for Module 1 framing.
- Detailed queue-joining, vendor-operation, and platform-admin wireframes.

IAS

Security, privacy, JWT/RBAC, vulnerability assessment, and post-MVP OAuth2 traceability.

- Role-aware screen mapping for customer, vendor staff, vendor admin, and platform admin.
- Privacy, data-flow, public-form, payment, and platform-operation risk notes.

Capstone Theme

GetPrio improves service queues by reducing customer uncertainty, lowering staff interruption, and aligning usable interface design with privacy, JWT/session authentication, RBAC authorization, post-MVP OAuth2 planning, and data-integrity concerns.
